

The screenshot shows a code editor interface with multiple tabs and a sidebar. The main tab contains a JavaScript file named `rext.js` with the following code:

```
random.html JS rext.js M X Extension: GitHub Copilot Chat

JS rextjs > ...

274
275     function check(callback){
276         setTimeout(() => {
277             console.log("USER IS LOGGING IN")
278             callback()
279         }, 5000);
280     }
281
282     function verify(callback){
283         setTimeout(() => {
284             console.log("USER VERIFY CART")
285             callback()
286         }, 5000);
287     }
288
289     function payment(callback){
290         setTimeout(() => {
291             console.log("PAYMENT DONE")
292             callback()
293         }, 5000);
294     }
295
296     function order(callback){
297         setTimeout(() => {
298             console.log("ORDER PLACED")
299             callback()
300         }, 5000);
301     }
302
303     check(() => {
304         verify(() => {
305             payment(() => {
306                 order(() =>{
307                     console.log('ALL TASK DONE')
308                 })
309             })
310         })
311     })
}
```

The sidebar on the right displays a tree view of the project structure, showing various files and folders. A tooltip at the bottom right corner says "Describe what to build next".
